absent	Moreed Zain Al Deen, Financial Coordinator Yasser Husni, Operations and Compliance Director Mohammed Abu Shamseyeh, Director of Emergency & Projects Implementation
author	Samar Shabati, HR/Admin Officer

During the meeting, it was discussed and agreed on the following:

- Ghada began the meeting by wishing everyone a happy Eid al-Adha.
- **Camp Situation:**
 - **Reem** spoke about the conditions during the holiday, noting that food availability had improved compared to last year. However, people were moving around less and more cautiously due to the sudden attacks and evacuation orders issued for certain areas just before the holiday, which could happen again at any time, as well as transportation difficulties.
 - **Reem** informed us that maintenance on the old generator has been completed and it is currently undergoing testing. A system and fuel supply are being set up to operate both generators, which will conserve diesel and reduce the strain on them. This is important because sometimes, mothers still need to bake or cook on electric stoves to save on cooking gas.

Reem mentioned that the Eid al-Adha staff fun day was taking place today. Ghada asked why it hadn't been scheduled during the Eid holiday. Reem replied that none of the venues that had submitted quotes had been able to offer a suitable venue that met the budget and specifications during the holiday period.
- **UNICEF project:**
 - **Wesal:** recently a visited four adolescents in Al-Awda Center were conducted to assess their situation there, in collaboration with MoSD. An agreement was reached with MoSD to assume full responsibility for the children once the project period ends, and to work in parallel on

MINUTES

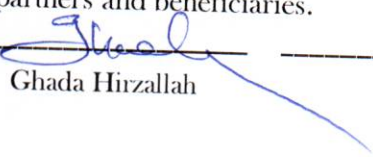

reuniting the children with their families and integrating them with their father in Egypt, in coordination with UNICEF.

- **Security situation:**

- **Mohammed Kaboub:** provided an update on the latest developments regarding the security situation, which were as follows:

- There has been a resurgence of attacks and shelling. Sometimes this is accompanied by warnings and evacuation orders for specific residential areas. At other times, specific locations and individuals are targeted without warning, regardless of time, place or the people involved. The danger on Salah al-Din Road has also increased as travel on this road has been prohibited due to its proximity to the 'yellow zone', where indiscriminate gunfire is constant and targets passers-by, whether in vehicles or on foot. Regular police checkpoints distributed along the streets are also being targeted.
- A meeting between the conflict parties and the mediators is expected to take place next Wednesday, when a decision will be made on whether to resume fighting.
- There remains a challenge regarding the availability of fuel, engine oil and spare parts. Preparations will be made to issue a bid to purchase diesel using the UNICEF budget, once the necessary approvals have been obtained.

Ghada It was pointed out that everyone should take their responsibilities seriously and demonstrate commitment in order to fulfil all the requirements of our projects and commitments to our donors, partners and beneficiaries.
