Professional Summary

Experienced IT Infrastructure & Security Manager with 14+ years leading cloud, network, and cybersecurity operations. Skilled in IAM, endpoint security, SaaS platform management, and SOC 2-aligned governance. Proven ability to build scalable systems, streamline processes, and enable secure, high-performance IT environments.

Experience

SOS Children's Villages - Palestine, ICT Manager

- National IT leader overseeing infrastructure, cybersecurity, cloud systems, data governance, user support, and digital transformation across multiple locations.
- Built and executed a multi-year IT & security strategy aligned with organizational goals, focused on modernization, resilience, and business impact.
- Led a cross-functional IT team and delivered enterprise-wide technology initiatives, including cloud migration, cybersecurity redesign, and systems modernization.
- Oversaw all Microsoft 365, Azure, and Cisco Meraki infrastructure, improving reliability, collaboration, and security posture.
- Designed and implemented hybrid infrastructure models, including backup, DR, and high-availability systems.
- Established security governance aligned with SOC 2-style controls, including identity management, endpoint security, access governance, and awareness training.
- Built and maintained disaster recovery, data protection, and business continuity plans across all sites.
- Oversaw key systems (HR, finance, cloud services, case management), including vendor evaluation, procurement, and lifecycle management.
- Streamlined workflows and introduced automation for onboarding, offboarding, and ITSM processes.

The Three Arches, IT Manager (Part-Time)

- Managed IT policy and network operations to maintain security and performance.
- Designed and implemented IT systems, policies, and backup strategies.
- Directed multi-department technology projects from planning to deployment.
- Prepared and controlled IT budgets, achieving operational cost savings.

Transcend Support Outsourcing, Network Engineer – Duty Office

- Configured routers, firewalls, and switch configurations of nodes at global locations.
- Provided support with VOIP systems and wireless network services.
- Play a part in global optimization of the network.
- Provided Tier 2/3 support for global networking infrastructure.

Jacir Palace Hotel, Technology Assistant

- Provided IT support, PC maintenance, and minimal database

troubleshooting.

- Performed audits and assisted in constant network and system hardware updates.

Xtreme Computer & More, Founder & Technical Director

- Organised and maintained a tech support company (server installation, hardware repair, and hosting).
- Implemented DNS servers (CentOS) and web hosting platform (Debian).
- Supported and trained clients for small businesses and NGOs.
